

Jason Kelvin Agung

Date of birth: 10/03/2004 | **Place of birth:** Bandung, Indonesia | **Nationality:** Indonesian |
Phone number: (+62) 89506152580 (Mobile) | **Email address:** jason.kelvin.agung@gmail.com |
Website: <https://jasonagung.vercel.app/> |
Address: Jl. Batununggal Jelita VI No.16, Mengger, Kec. Bandung Kidul, Kota Bandung, Jawa Barat, 40267, Bandung, Indonesia (Home)

● ABOUT ME

Information Technology graduate from Universitas Katolik Parahyangan (UNPAR) with a strong foundation in Computer Science principles. I am passionate about Artificial Intelligence, Performance Optimization, and Software Engineering. Beyond my technical abilities, I am a collaborative team player with experience in organizing workshops and communicating complex technical concepts to diverse audiences. I am eager to leverage my algorithmic problem-solving skills in a challenging academic or professional environment.

● WORK EXPERIENCE

AI IMPLEMENTATION SPECIALIST – DEUS HUMAN CAPITAL SERVICES – 06/01/2026 – Current – BANDUNG, INDONESIA

- Lead the transition of a gamified assessment system from static, template-based reporting to a dynamic Generative AI model.
- Engineered an automated pipeline to synthesize 32 personality subtraits into highly personalized, unique behavioral reports.
- Optimized report quality by designing advanced prompt frameworks that transform raw psychometric data into nuanced, human-like insights.

APPLIED AI & RESEARCH INTERN – TALENTSOURCE BANDUNG – 22/08/2025 – Current – BANDUNG, INDONESIA

- Spearheaded R&D of Machine Learning models for BSF farming optimization, utilizing ChatGPT & Google Vertex AI (AutoML) for synthetic data generation, model training, and deployment.
- Accelerated web development lifecycle by leveraging Generative AI tools (v0, Bolt.new, Gemini CLI) to overhaul and modernize the company website.
- Developed and delivered "GenAI & Prompt Engineering" workshops tailored for leading institutions and corporate clients, including Telkom, TelkomMedika, TelkomMetra, Asosiasi Dana Pensiun Indonesia (ADPI), and KWI Komisi Komunikasi Sosial.

ACADEMIC DIVISION STAFF – HMPSIF (INFORMATICS STUDENT ASSOCIATION) – 01/08/2023 – 01/08/2024 – BANDUNG, INDONESIA

- Organized academic tutorials and peer-mentoring sessions for core Computer Science subjects (Algorithms, Logic).
- Acted as a liaison between students and faculty to improve academic resources.
- Organized charity events and provided IT education for underprivileged individuals.

● EDUCATION AND TRAINING

22/08/2022 – 17/07/2026 Bandung, Indonesia
BACHELOR OF COMPUTER SCIENCE (SARJANA KOMPUTER) Universitas Katolik Parahyangan (UNPAR)

Main subject / Occupational skills covered:

- Artificial Intelligence & Data Science: Machine Learning, Fuzzy Systems, Information Retrieval, and Optimization Techniques.

- Software Engineering & Algorithms: Advanced Data Structures, Object-Oriented Programming (OOP), and Algorithm Design.
- Computational Mathematics: Discrete Mathematics, Statistics for Computing, Matrix & Vector Spaces, and Logic.

Address Jalan Ciumbuleuit No.94, Bandung, Indonesia | **Website** unpar.ac.id |

Field of study Information and Communication Technologies | **Final grade** 3,67 |

Thesis Comparative Analysis of Backtracking and Simulated Annealing Algorithms for Solving the Tango Logic Puzzle

● SKILLS

Artificial Intelligence & Data Science

Python | Scikit-learn | NumPy | Pandas

Software Engineering & Development

GO | C/C++ | JavaScript | SQL | Java

Communication and Interpersonal Skills

Technical Communication: | Public Speaking | Academic Mentoring | Project Leadership

● PROJECTS

01/08/2025 – 17/07/2026

Comparative Analysis of Backtracking and Simulated Annealing Algorithms for Solving the Tango Logic Puzzle

- Developed an intelligent agent to solve the binary Constraint Satisfaction Problem (CSP) "Tango."
- Implemented and conducted a comparative performance analysis between Backtracking (CSP) and Simulated Annealing (Metaheuristic) algorithms.
- Analyzed search space pruning efficiency and local optima avoidance.
- Technologies: Python, Heuristic Search Algorithms.

06/04/2026 – CURRENT

AI-Driven Personalized Reporting Engine

- Developed an AI-driven reporting engine that transforms raw data from 32 personality subtraits into highly personalized and unique behavioral narratives.
- Modernized the assessment system by replacing legacy predefined statements with a dynamic Generative AI pipeline to eliminate repetitive reporting.
- Engineered advanced prompt frameworks to ensure that AI-generated insights remained psychologically accurate and aligned with the scoring logic.
- Improved user experience by delivering individualized reports that provide nuanced descriptions of strengths and development areas instead of generic templates.

22/08/2025 – 10/11/2025

GenAI-Accelerated Machine Learning for BSF Farming

- Applied Generative AI platforms to accelerate the development of ML models for Black Soldier Fly (BSF) farming optimization.
- Performed synthetic data preparation and built predictive models to analyze farming variables.
- Evaluated the efficacy of AI-assisted development workflows versus traditional coding for data science tasks.
- Technologies: Machine Learning, Data Analysis, GenAI Platforms.

22/08/2025 – CURRENT

Generative AI & Prompt Engineering Workshop

- Designed and delivered a comprehensive technical workshop in Bahasa Indonesia to democratize access to AI tools.
- Taught "Prompt Engineering" techniques to non-technical participants, focusing on LLM limitations and effective context setting.
- Managed the full project lifecycle: curriculum design, practical exercises, and public speaking.
- Skills: Technical Communication, Leadership, Education.
